INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/JP2004/000559

Box No. I	Basis of the report
otherw	egard to the language, this report is based on the international application in the language in which it was filed, unless vise indicated under this item. This report is based on translations from the original language into the following language which is the language of a translation furnished for the purposes of: international search (under Rules 12.3 and 23.1(b)) publication of the international application (under Rule 12.4) international preliminary examination (under Rules 55.2 and/or 55.3)
furnish	regard to the elements of the international application, this report is based on (replacement sheets which have been need to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" a not annexed to this report):
	the international application as originally filed/furnished
	the description:
1	pages as originally filed/furnished
	pages* received by this Authority on
	pages* received by this Authority on
🗆 ¹	the claims:
1	pages as originally filed/furnished
1	pages* as amended (together with any statement) under Article 19
	pages* received by this Authority on pages* received by this Authority on
	the drawings:
·	pages as originally filed/furnished pages* received by this Authority on
	pages* received by this Authority on
"	a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing.
3	The amendments have resulted in the cancellation of:
	the description, pages
	the claims, Nos.
	the drawings, sheets/figs
[the sequence listing (specify):
[any table(s) related to sequence listing (specify):
Т	This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)). the description, pages
ſ	the claims, Nos.
<u>Г</u>	
L	the drawings, sheets/figs
L	the sequence listing (specify):
[any table(s) related to sequence listing (specify):
* If item 4	applies, some or all of those sheets may be marked "superseded."

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

Box No. V Reasoned state citations and e	ment under Articl xplanations suppo	e 35(2) with regard to novelty, inventive step or industrial applicability; rting such statement		
1. Statement				
Novelty (N)	Claims	1-12	YES	
	Claims	None	NO	
Inventive step (IS)	Claims	None	YES	
	Claims	1-12	NO	
Industrial applicability (IA)	(IA) Claims	1-12	YES	
	Claims	None	NO NO	

2. Citations and explanations (Rule 70.7)

The following documents have been considered for the purpose of this report:

D1 = US 2002/0085284 A1(Kazuhiro Nakamura), 2002.07.04

D2 = US 2002/0187324 A1(LINTEC CORPORATION), 2002.12.12

D3 = JP 2001-51610 A(MITSUBISHI KAGAKU CO.,LTD),2001.02.23

D4 = WO 01/81466 A1(DSM N.V & JSR CORPORATION & JAPAN FINE COATINGS CO.,LTD),2001.11.01

Claim 1-12

The subject matter of claim 1 does not appear to involve an inventive step in view of the document 1(D1) cited in the ISR and the document 2-4(D2-4) cited in the same. The D1 is considered to represent the closest prior art for the subject matter of claim 1. D1 discloses that an antireflection film comprising a transparent support, at least one hard coat layer and low reflactive index layer, in this order, wherein the hard coat layer includes a polymerized product of a polyfunctional acrylate monomer having no oxide adduct.

D2-D4 disclose that the hard coat layer includes a polymerized product of an ethylene oxide or propylene oxide adduct of a polyfunctional acrylate monomer and a polyfunctional acrylate monomer having no oxide adduct.

Technical features the hard coat layer and the hard coat layer, disclosed in D1 and D2-4 respectively, have the same function and are related to similar technical fields. Therefore, the skilled person in the art would easily conceive the idea of substituting the feature of the hard coat layer in D2-4 for the feature of the hard coat layer disclosed in D1.

The technical features which are suggested by claims 2-4 respectively are disclosed in D2 or D3.

The technical features which are suggested by claims 5-12 respectively are disclosed in D1.
